B-Cam Ltd achieves ISO 9001:2015 and ISO 27001:2013 certifications from the British Assessment Bureau

Reading (UK) based B-Cam Ltd, producer and retailer of body worn camera solutions has achieved certification to the internationally recognised ISO 9001:2015 and ISO 27001:2013 standards, establishing it as one of the leaders in its field.

This independent assessment was conducted by the British Assessment Bureau, a leading Certification Body, and demonstrates B-Cam Ltd's commitment to customer service and quality in delivery, as well as keeping their data, staff and premises secure.

B-Cam Ltd has now earned the right to display the coveted British Assessment Bureau quality shield and 9001:2015 and 27001:2013 logos to demonstrate its conformance to the standards.

ISO 9001 was first introduced in 1987 and requires organisations to demonstrate that they do what they say they do, and that they have a Quality Management System in place to ensure consistency and improvement; leading to high levels of performance and customer satisfaction. Certified organisations are committed to continuous improvement and are assessed to ensure progress is being maintained.

ISO 27001 is the internationally recognised Information Security Management Standard that proves an organisation's commitment to the security of their customer, employee and shareholder's information. With ISO 27001 in place, B-Cam Ltd is able to minimise risks to potential data security breaches and reduce errors and costs, while demonstrating credibility and trust.

B-Cam Ltd has shown they have good product and service reliability and process controls, which means lower costs for its customers.

B-Cam Ltd's CEO, Herman Vermaak said, "We're particularly pleased to have achieved ISO 9001:2015 certification as it underlines our commitment to our customers and our focus on quality. Not many customers get to see their suppliers' 'back office' activities. This recognition demonstrates we can

provide a quality solution from quotation to delivery. We are also proud to be ISO 27001:2013 certified, as security is our priority in order to minimise risks to potential data security breaches and reduce errors and costs for our company and customers.”

The benefits of certification to ISO 9001 include:

- Streamlining an organisation’s procedures;
- Bringing consistency to an organisation’s service delivery;
- Reducing cost and rework;
- Improving an organisation’s management practices;
- Enhanced status;
- Competitive advantage;
- Lower insurance premiums.

The benefits of certification to ISO 27001 include:

- Proving to clients an organisation keeps their information secure;
- Achieve operational excellence;
- Minimise risk of potential data security breaches;
- Protects reputation;
- Reduces errors and costs;
- Increases business profitability;
- Engage employees.

THE BRITISH ASSESSMENT BUREAU

The British Assessment Bureau's reputation was established in 1969 as a specialist in certification scheme management. In 1997, the Secretary of State for Trade and Industry approved the use of the word 'British' in their title, in recognition of their pre-eminent status.

Today, they certify organisations to recognised standards, including ISO 9001 (quality management), ISO 14001 (environmental management), ISO 27001 (information security management) and OHSAS 18001 (occupational health and safety management). They also design and manage bespoke assessment schemes. Such schemes are based on the establishment of standards, which can be developed to be recognised company-wide, industry-wide, nationally, or internationally.
