B-CAM Ltd.

You have purchased a B-Cam Compact Docking Station. This docking station is designed to upload data from one Compact, to the cloud server, at a time.

Parts enclosed with docking station:

x1 Power Plug

x1 Network Cable

1x B-cam Single Dock

Dock set-up and operation.

1

Network port (left)

Power port (back)

Connect the network cable and power plug into their respective ports. Once the dock has been plugged in, the red LED will power on.

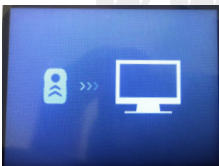

2

B-Cam Compact mounted in dock

To upload, mount the B-Cam Compact as shown.

- The B-Cam Compact will turn on and display an uploading screen.
- During the course of the upload, the B-Cam Compact will complete 3 power cycles. In those cycles the device will register and upload, before finally formatting.
- Once this process is complete, the B-Cam Compact will begin its charging mode. The display screen will remain off and a red charging light (front of the device) will turn on.
- The charging light will change to green once the B-Cam Compact has fully charged.
